Bengaluru, India

## SUMMARY

Experienced Software Developer with expertise in WPF, ASP.NET Core, React.js, Node.js, C#, SQL programming and MongoDB and AI integration with hands on experience on python. Led the development and maintenance of software applications, successfully delivered projects on time and achieved a 40% improvement in app performance and 35% increase in user performance with amazing UI experience. Skilled in solving complex development challenges and creating high-quality, custom software solutions tailored to business needs.

## SKILLS

**Technologies** : .Net Core, WPF, C#, ASP.NET Core, React JS, Node JS, Entity Framework Core, LINQ, Prism, XAML , MVVM, Python, Javascript

**Databases** : SQLite, PostgreSQL, SQL Server, MongoDB

**Version Control** : Git, Github, Bitbucket , Sourcetree

**Tools** : Visual Studio, Visual Studio Code, Postman, Fiddler, XUnit, Docker, AWS, Azure

## WORK EXPERIENCE

**Globussoft Technology** [Product Based]

*Bangalore, India*

**Software Developer**

May 2023 – May 2025

- Led multiple projects development with teammates and mentored them as well for solving problems to find better solution. Developed and contributed in desktop based apps where used .Net framework and .Net core, WPF, Prism, Windows Service, SQLite and in web based apps using React JS and APIs using ASP.NET Core web api with sql server and PostgreSQL
- Collaborated with cross-functional teams to gather requirements. Delivered scalable and high-performing applications with optimized UI experience.

**Senior Software Developer**

May 2025 – Present

- Analyzing and participating in requirement gathering discussion with the implementation of the product using the required technologies
- Collaborating with other team senior developers and technical architecture to architect and implement the requirements in codes and project structure

## EDUCATION

**Bachelor of Technology** in Electrical Engineering from Government College of Engineering, Keonjhar, *Odisha, India*

**12<sup>th</sup> or Intermediate** in Science from N.C. Autonomous College, Jajpur, *Odisha, India*

**10<sup>th</sup> or Matric** from Braja Sundar High School, Sayedpur, Jajpur, *Odisha, India*

## PROJECTS

### AltraVera

Sep 2025 – Oct 2025

- Led and contributed mainly in development. It's an WPF Desktop app installer for an windows based application, a remote desktop connection app where client asked to develop a custom RDP to connect securely from host to VM. I have led the development of the custom UI Installer with functionality like managing registry and shortcuts and other.
- This installer is extremely lower in size and high in performance used AWS bucket to fetch the deployed files during installation resulting in higher level of architecture with scalability.

### SocialX

Jun 2025 – Sep 2025

- Led and Contributed in developing WPF Desktop app, mainly a Social Media Automation Tool, makes all this work easier for digital marketers and social media influencers. It supports social sites (Facebook, Twitter, Instagram, Pinterest, Reddit, Tumblr, LinkedIn, YouTube, Quora) It manages multiple socialMedia accounts and monitors their activities by scheduling task and save a lot of time.
- Here i have added GoogleSheet and Airtable to fetch data campaign related and update in sheet using apis after completion like autofetching and autoupdating the campaign also. Used Multilogin browser automation and upgraded the old Socinator architecture to handle large amounts of data like accounts and campaign details and UI with custom loader and database management for multiple threads to handle bulk accounts.

### VideoraIQ

Apr 2025 – May 2025

- Led and Contributed in development of a local windows service app with the help of an WPF Windows installer for conversion of RSTP protocol camera stream to web view format using FFMPEG. Here i have to fetch the RSTP camera url from react js locally using websocket and sending the converted camera stream it to front end UI using websocket in each PC differently. Collaborated with Front end React JS team and Data Science AI team for this AI powered surveillance assistant to monitor, detect, and act on real-time threats with smart alerts from camera stream.
- In web based app used react js to show camera stream with alerts with the help of AI Models.

### Socinator

Dec 2024 – Mar 2025

- Developed, maintained and implemented a modular based architecture for the wpf desktop app of social media automation application. Enhancing application stability by 25% and upgraded .net framework version from 4.6 to 4.8.1 latest for better performance.
- Here we have used WPF with Prism framework and Sqlite for database locally. Here we automate the social media automation task working with handling Http request, managing cookies and multithreading. It supports social sites. It manages multiple socialMedia accounts and monitors their activities by scheduling task and save a lot of time.

### Xperts Interior

Jun 2024 – Aug 2024

- Architected a web based app as team lead and senior developer for a business of Interior Design result in customer reach increase by 30% of client with amazing UI experience.
- Developed this app as a lead developer using the technologies like React JS, Node JS on framework like Next JS.

### Power Browser Installer

Jan 2024 – Feb 2024

- Developed and maintained this wpf app to install the power browser in client system with amazing UI experience.
- Improved the installing process compared to chrome installer and nearly 50% size reduce result in less load on system.

### KAMH-Console

Sep 2023 – Nov 2023

- Delivered this desktop application by upgrading .net version and better Sql queries result in performance improve nearly 25%.
- Maintained this for any changes from Instagram end api changes or response changes result in stability of application.
